

The background features a low-angle shot of a yellow Liebherr excavator against a blue sky with clouds. A large, semi-transparent circular graphic is overlaid on the right side of the image. This graphic consists of a dark blue central circle, surrounded by a ring of four light blue arrow segments pointing clockwise. The text 'CMMS INFORM OPERATIVE' is written in large, bold, green capital letters across the center of the dark blue circle.

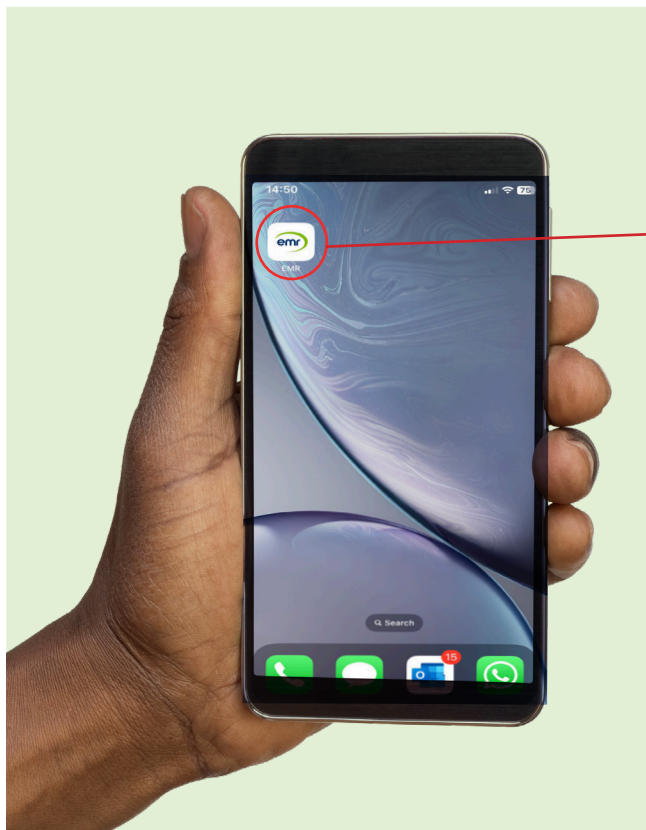

CMMS INFORM OPERATIVE

1 INTRODUCTION

The EMR app on company phones and tablets is the access point for INFORM. INFORM allows a user to complete forms to support operations and the Computerised Maintenance Management System (CMMS).

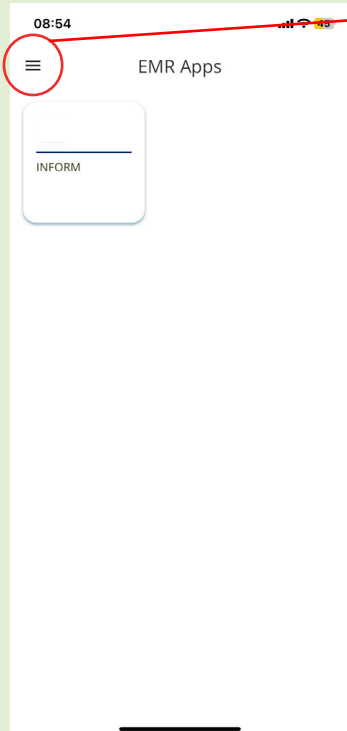

2 ACCESSING INFORM

On your EMR mobile device, find and open the EMR app.

This will open the screen on the right.

If this icon is not visible on your device, contact the IT service desk.

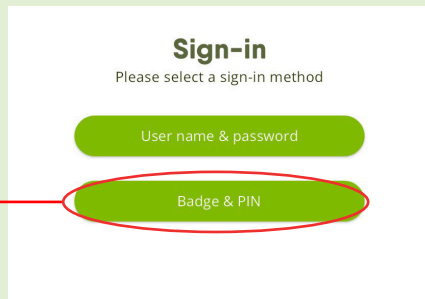

Click here to see the menu of all available apps.

Click on the INFORM App.

If your screen doesn't show INFORM, then contact the IT Service Desk.

3 FIRST TIME LOGIN

Sign-in
Please select a sign-in method

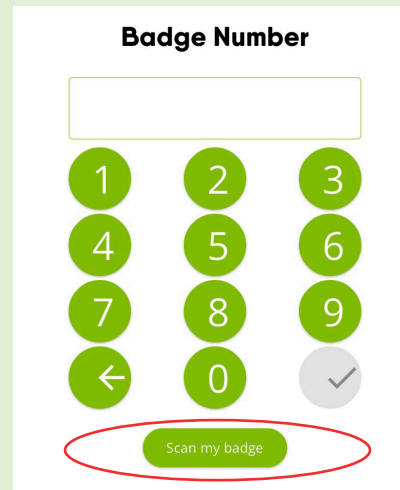

User name & password

Badge & PIN

First time logging in, you will need your EMR ID card and PIN.

If you don't know your PIN or have any issues, call the IT service desk and ask them to confirm or reset.

Select the **BADGE & PIN** button.

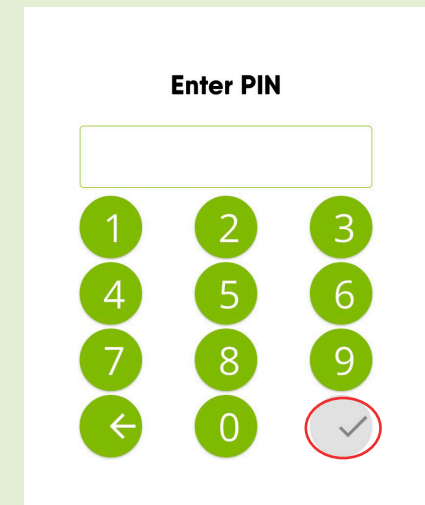

Badge Number

1 2 3
4 5 6
7 8 9
← 0 ✓

Scan my badge

Select the 'Scan my badge' button. Scan the QR code on the EMR ID card.

When asked 'EMR would like to access your camera' click 'OK'.

Enter PIN

1 2 3
4 5 6
7 8 9
← 0 ✓

Enter the badge PIN and select the tick button.

If this is the first time that you have used your PIN, you will be asked to change it and then confirm the change.

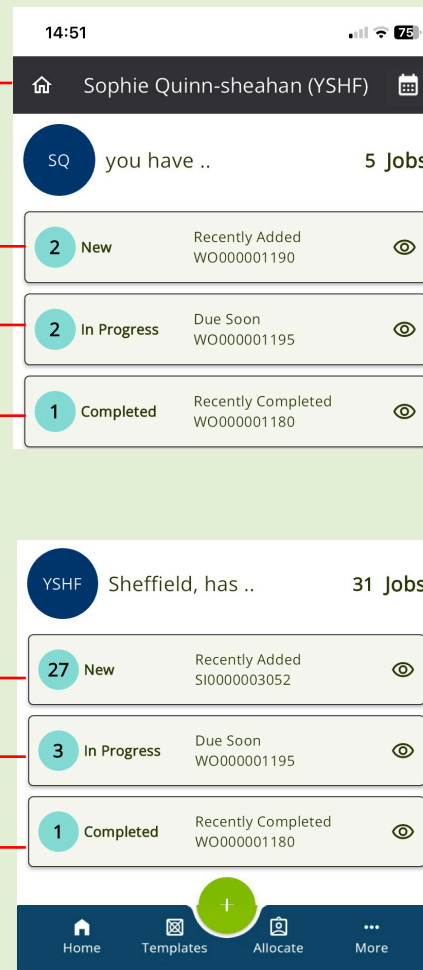

4 INFORM LANDING PAGE

Individual who is signed into the app

Jobs assigned to the individual

Jobs assigned to the yard

New - Shows new jobs assigned to:

- The individual in the top section
- The yard in the bottom section

In Progress - Shows the jobs that have already started and need completing by:

- The individual in the top section
- The yard in the bottom section

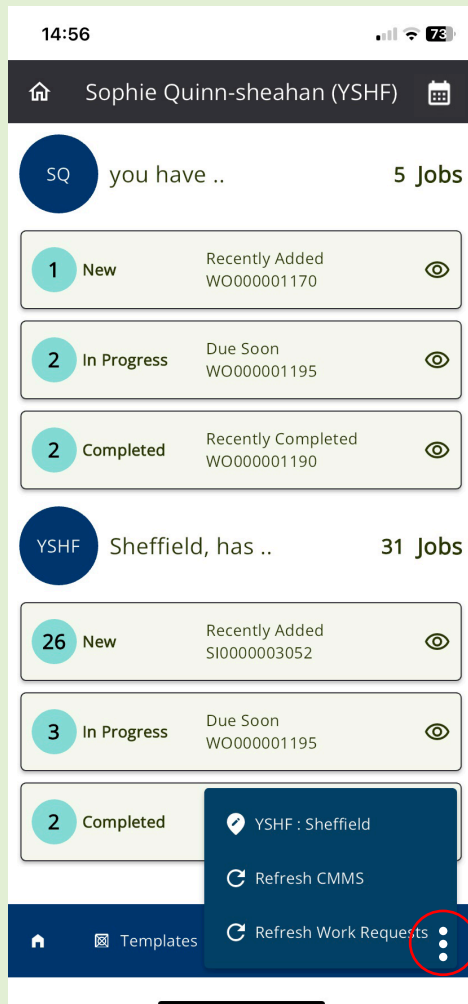

Completed - Shows the jobs that have been completed by:

- The individual in the top section
- The yard in the bottom section

It will show the historic work requests and work orders that have been completed.

5 CHANGING YOUR LOCATION

If you work at different yards you will need to change your location

Click the three dots.

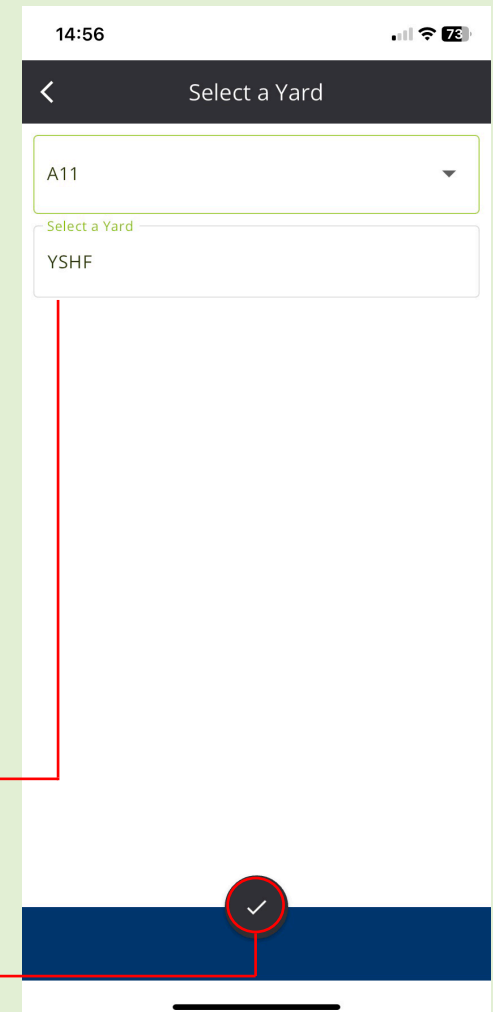

A menu with three options will appear.

This example shows YSHF Sheffield.

Click YSHF Sheffield, then select the correct yard.

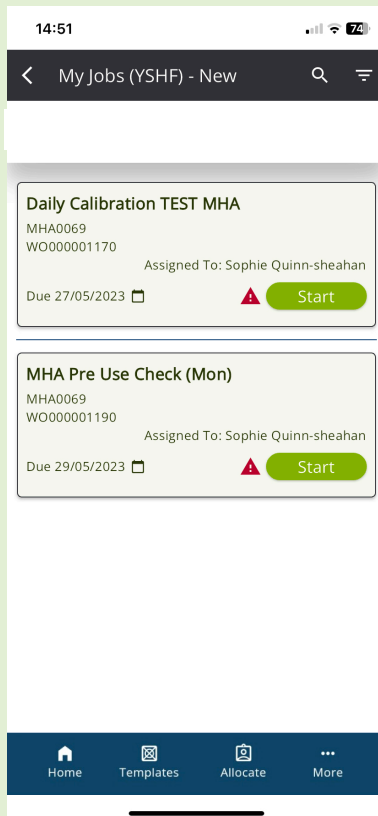

Ensure the territory is A11. (A11 is for the UK)

Confirm by clicking the tick.

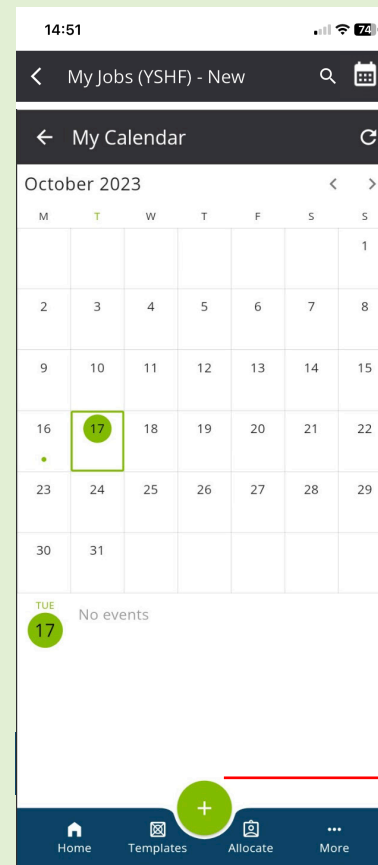

6 USING THE SEARCH FUNCTION TO LOOK FOR JOBS

List of jobs for the individual, two jobs in this example. It is possible to search by using dates or asset type.

Searching for jobs using date/s:

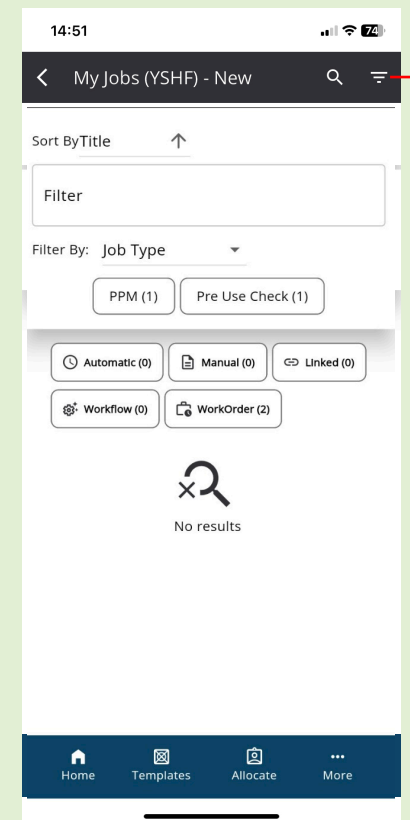

Click here to filter a date/s range

Select date/s here

Once you have selected the correct date/s, click Confirm.

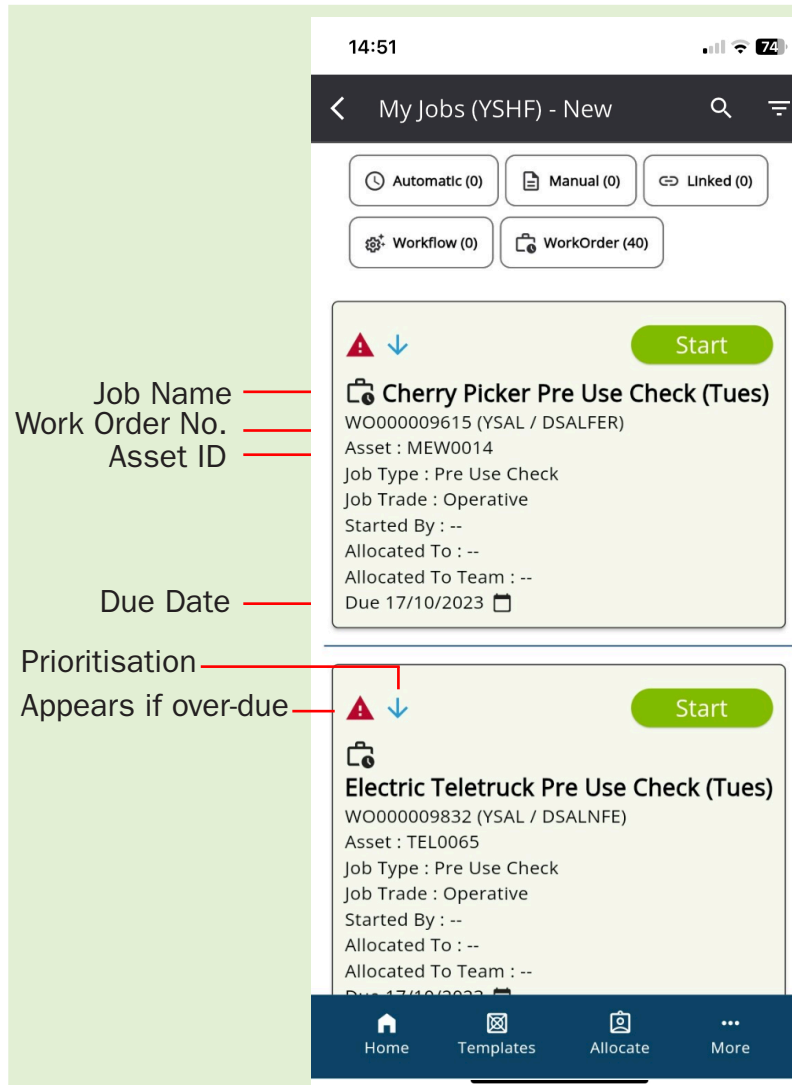

Searching for jobs using Asset ID, work order ID and Work Order Description

Click on the menu and choose the asset ID, work order ID or work order description. Click 'Confirm'.

7 STARTING A JOB

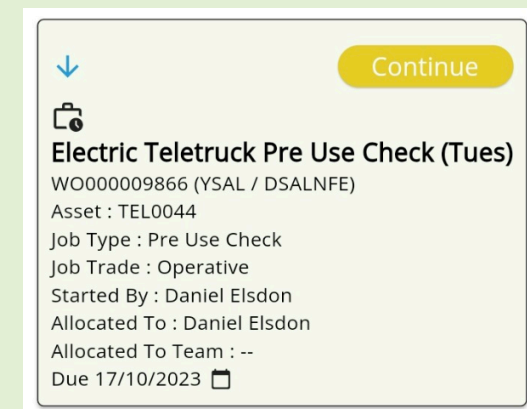

Once you have found the correct job you will see details displayed on the job header.

Click the start button to start completing the job.

Start button for jobs

This example shows pre-use checks that have been started but not completed, click continue to finish the checks.

8 PRIORITISATION

Critical = double up arrow in **red** High = ! in **red**

The screenshot shows a mobile application interface titled '← My Jobs (YNGA) - New'. It displays six job cards arranged in a 2x3 grid. Each card contains job details and a 'Start' button. Priority levels are indicated by icons: Critical (red double up arrow), High (red exclamation mark), Low (blue down arrow), Medium (orange up arrow), and Urgent (red blocker icon). Red lines connect the explanatory text at the top to the respective icons on the job cards.

Job ID	Priority	Icon Description
001	Default	Red triangle, info icon, exclamation mark
Critical Priority	Critical	Red triangle, double up arrow
High Priority	High	Red triangle, exclamation mark
Low Priority	Low	Red triangle, blue down arrow
Medium Priority	Medium	Red triangle, orange up arrow
Urgent Priority	Urgent	Red triangle, blocker icon

1. Low = down arrow in **blue** Medium = up arrow in **orange** Urgent = Blocker in **red**

There are five priorities that can be assigned to a job. Initially the person doing the checks can say what priority the job should be. This information will be assessed by the manager who will assign the priority level.

9 COMPLETING A JOB

You will have to answer several questions, input details or choose from a drop-down menu to complete. Some questions you may have to answer YES (everything is OK), NO (there is an issue or problem to report), N/A (not applicable) or S/R (self repair).

10 COMPLETING A JOB (DIFFERENT SCENARIOS YOU MAY SEE)

In this example everything has been checked against the question and is OK. The 'Y' icon has been selected and has turned into a green tick.

When checking this question a fault was found that needs reporting. Click the 'N' icon, this will turn into a red cross.

When the icon turns red you will be asked to add an image/video and comments.

Adding comments:

Accurate comments have been added to ensure management understand the issue.

Adding media:

Images and video have been taken and added. This example shows 1 image has been added. See Pg 11 on how to add media.

11 INFORMATION, ADVISORY AND WARNING BOXES

Within each job there are different coloured headers to make it as clear as possible to the user.

Any info, advisory or warnings boxes are coloured so that the user knows what they are.

13:50

WO000001170

START TEST END

and 40j

Please add some example text or comment *

☐ Blue Info Box - The contractor should have provided RAMS

☐ Yellow Advisory Box - Do not proceed unless PPE is worn

☐ Red Warning Box - Stop if contractor is not trained

Please check this box if you are happy the machine is ready for Calibration ☐

Information boxes contain a **blue** header. These contain any info that the user may need to know.

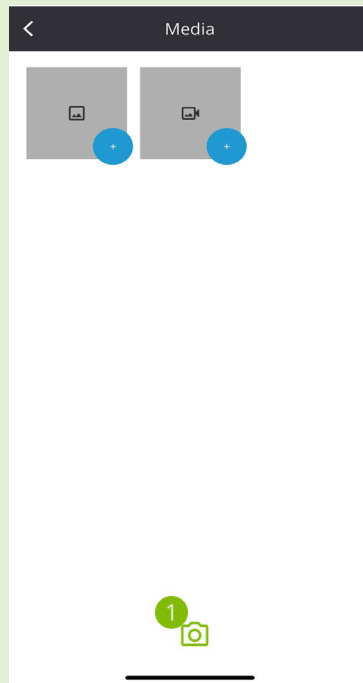

Advisory boxes contain an **amber** header, these advise the user of specifics for that job.

A warning box contains a **red** header. These are generally H&S warnings and must not be ignored.

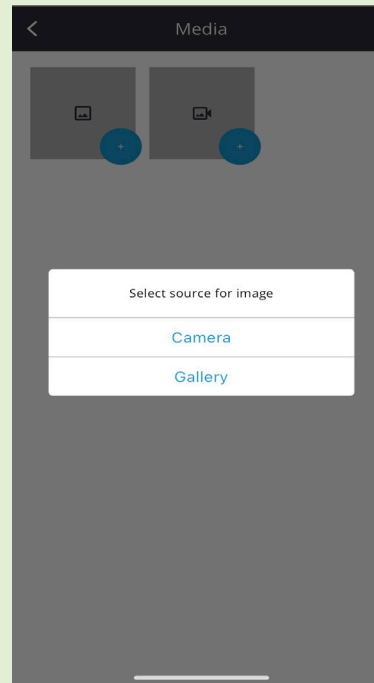

12 ADDING MEDIA

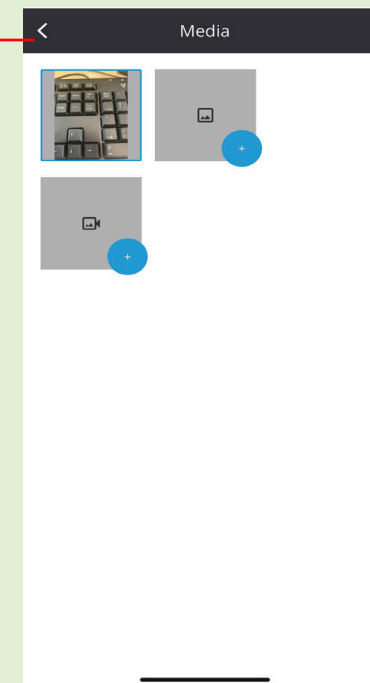

You can add media to any job line but it is mandatory on a failed question.

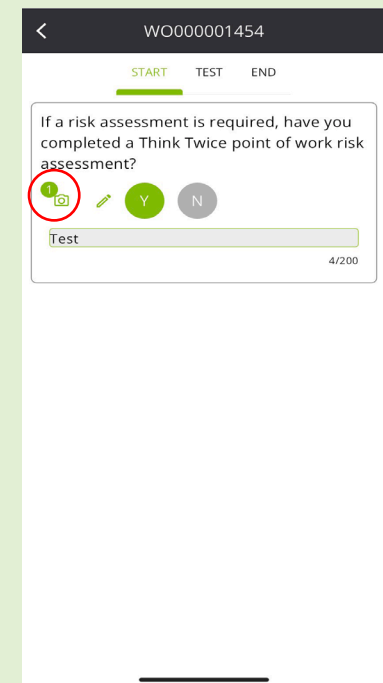

To add any media against any line in a job, click the camera icon. This takes you to the media page. On the media page click photo or video icon to add media.

Select source of media – camera or gallery and then use device functions as normal to select a picture/video or take a picture/video.

Once this has been done the media will appear on the media page. Once it appears click the back arrow.

The camera icon will now turn green and show the number of media files you have uploaded.

13 FORM SUBMISSION

At the end of the form will be a submit button. You may see a warning box if any questions have failed. The form will automatically note your name, the date and time. There will be a final confirmation tick box. If you are happy that you've done everything tick the box, sign your name in the signature box and press submit.

You must write your signature here.

You must tick confirm and sign in the grey box before submitting.

You must fully complete all of the questions to submit. If the question turns red there is a problem with the details, you have not added sufficient detail.

Or if you have failed a question but not added a comment or media, this will also be highlighted in red.

For some forms, when questions are failed, a red warning box may appear to instruct you not to continue or to report issues to site management.

14

SECOND OR THIRD USER OF AN ASSET - VERIFICATION OF INITIAL PRE-USE CHECK

Assets such as a forklift truck can be used by several people during the shift/day.

The first person must carry out full pre-use checks as per the pages above.

If you are the second/third user of that asset that shift/day then you must verify all of the initial pre-use checks have been carried out.

If there have been no changes since these checks you will sign the document and submit.

If any faults or damage need reporting since the pre-use checks then follow the advice in this guide for ad-hoc report.

15 RESET A FORM

You may need to reset this form if it has been started in error or if someone else has started filling in the form incorrectly. This process shows you how to clear a form that has already been started. All questions that have been answered, all media and comments added will be deleted and reset. These forms will be visible in the 'In Progress' section of the landing page. Find the relevant job using the search functions, (see PAGE 6).

The form will no longer show in the in progress section once reset.
